

INDIANA ACADEMY OF OPHTHALMOLOGY

Ophthalmology practices are not islands unto themselves. They are affected by multilayered, external frameworks, such as legal/regulatory, insurance industry and public relations, and interdependent workings with other health professionals.

That's where the IAO comes into play.

Advocacy

IAO's primary goal is to **protect the jobs** of Indiana ophthalmologists through representation in front of the Indiana General Assembly and regulatory agencies.

Information

Better information means better decisions for your practice. The IAO offers Help Forms that can be used for coding, billing, and reimbursement issues.

Consumer & Public Relations

Patients trust affiliations and involvement. IAO provides credibility and visibility to your practice, and promotes ophthalmology as a profession.

Expansion of Opportunities

Networking is important. Building your network helps to build your practice. Other opportunities include discounts on malpractice insurance through OMIC.

Professional Development

High-caliber speakers are brought locally to IAO events, so you can learn straight from the experts. The IAO offers both scientific seminars and coding updates.

LEVERAGE + RESOURCES - JOIN NOW

The IAO gives you leverage and resources to meet your business needs, and it protects the profession, your livelihood, and your patients.
